

Core Competencies

Synchronized clocks manufactured by American Time & Signal Co. improve productivity in facilities throughout the world. Our 75 full time employees are dedicated to building quality products with short lead times. In fact, many products are in stock and ship the same day as the order.

Think of how much “time theft” (starting late, long breaks and stopping work early) costs facilities every year. An extra two minutes of breaks and lunches per day for 50 employees at \$15 an hour adds up to \$375 per week or \$19,500 per year in payroll costs. Do the math on 100 or 500 employees! **A wireless clock system pays for itself in days or weeks** depending on the size of the facility.

Corporate Information

Duns: 039378641

Cage: 1JY82

GSA Schedule: GS-35F-0608V

NAICS: 334220
334290
334518

Established: 1980

Facility Size: 40,000 sq. ft.

Business Size: Small

We accept credit and purchase cards

The Benefits of Synchronized Time are:

- Precise time stamps of events and procedures improves accountability
- Reduce defects and downtime due to time inaccuracy
- Minimize payroll, billing and insurance disputes

Past Performance

create a great first
impression.**

“*I have been purchasing products from American Time & Signal for over 10 years, and they have consistently exceeded my expectations in every area. In a time where customer service and personal attention to the customer seem to be waning or non-existent, they excel. Every salesperson I've dealt with has been extremely courteous and helpful.*

All of my orders have been on time and the quality of their products seems to be exceptional. I recently purchased a complete wireless clock system for a major university which consisted of over 200 clocks, and we have not had one problem or defective item. I highly recommend American Time & Signal.”
